

PRESS RELEASE... Immediate release 10.00am 3/2/2016 .

Monoposto Championship announces new partner for 2016

The Monoposto Racing Club (MRC) is delighted to announce a new multi faceted partnership with the JMTechnical Group (JMT) for 2016

As well as becoming the title sponsor for the prestigious JMT Mono Championship, JMT will provide a number of significant services to the MRC. These include:

- 240V power generation for the entire Monoposto paddock where circuit power is not available
- Enhancing the established Monoposto Paddock Hub facilities enjoyed by Monoposto members

JMTechnical group is a company that provides our customers with engineering solutions. We work in some of the most challenging environments delivering complex and diverse systems. Our products and services range from airport security checkpoints to kinetic energy recovery systems. The multi industry experience of our team allows us to deliver unparalleled world class solutions.

The JMT Mono Championship 2016 will be contested over 16 rounds at some of the finest circuits in the UK. Monoposto members compete in seven classes across a typical two grid format. In 2015 these grids were near capacity and this success is expected to continue.

MRC Chairman, Edward Guest commented that “support from JMTechnical will certainly enhance the racing experience with our club for our members. Many of our championship rounds are over a weekend so for JMTechnical to be able to provide additional paddock facilities for our members will be a great improvement and we look forward to a long association with them.”

JMTechnical Group Managing Director, James Williams said "At JMT we are very excited about this new partnership with Monoposto and the opportunities it will bring. Monoposto has been a great launch pad for our motorsport division and we look forward to the release of some new products and services this year. "
